NCE/NCT Classica

CLASSICIAL DESIGN, ENDURING ATTRACTION

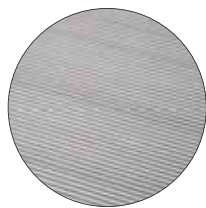

Traditional in conception, the Classica line is a practical and robust design incorporating components of incomparable quality.

As its name implies, it embodies time-honoured escalator and Trav-O-Lator® aesthetics.

Natural finished aluminium steps for the escalator and silver grey finished pallets for the moving walk combine with a natural aluminium comb and comb-plate. The handrail is black which is complemented by a jet black steel handrail entry box and jet black skirt panels. Silver grey aluminium decking and a clear safety glass balustrade provide a contrasting aesthetic.

The underlying elegance of the Classica design lies in the sleek profile with an eye-catching balance between truss and balustrade heights. This factor, together with the sweep of the elongated newel, provides an understated elegance.

In short, the NCE and NCT Classica line delivers uncomplicated looks, sober in conception but enduring in appeal.

COMB/COMBPLATE

Natural aluminium

INNER AND OUTER DECKING

Silver grey, powder-coated aluminium

HANDRAIL

Black synthetic rubber

①

SKIRT PANEL

① Jet black, powder-coated steel (standard)

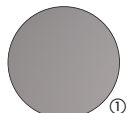

HANDRAIL ENTRY BOX

Jet black, powder-coated steel
