

Gen3™ elevator

A platform for possibility

OTIS

A FULLY CONNECTED PLATFORM

A platform for possibility

Every aspect of modern life is changing. The ways we connect. The experiences we have. The places we live, work and play. The elevator needs to advance as well to harness the numerous possibilities of a more connected future - and Otis is taking you there.

The new Gen3™ elevator brings the promise of a connected platform into today. With the proven design of our best-selling Gen2® elevator and the built-in connectivity of our Otis ONE™ IoT digital platform, the Gen3 elevator is advancing in new ways.

EXPERIENCES. ADVANCED.

The latest connected technologies put passengers in control and ensure a smooth, seamless ride, time after time.

SERVICES. ADVANCED.

More personalized services through our Otis ONE IoT digital platform to keep you ahead of potential issues.

DESIGN. ADVANCED.

Sophisticated aesthetics and a range of options fit most buildings and diverse style choices.

HEALTH & SAFETY. ADVANCED.

We prioritize safety and every passenger's health and well-being.

CUSTOMER SUPPORT. ADVANCED.

From resources and tools to guidance and expertise, Otis makes planning and managing smarter and simpler.

PEOPLE FIRST

The Gen3 elevator reflects human-centric innovation and design, offering safe and comfortable rides, promoting healthier environments and delivering confidence and convenience.

READY FOR WHAT'S NEXT

The Otis ONE IoT digital platform design allows the Gen3 elevator to add many new future technologies. By enabling the flexible, seamless addition of technologies without a complete system upgrade, you can anticipate the challenges and opportunities of tomorrow.

EFFICIENCY ALWAYS

The Gen3 elevator is designed with features that are up to 50% more energy efficient than conventional elevators, achieving substantial energy savings and significant reductions in CO2 emissions.

Solutions for your world.

Our Gen3 elevators blend convenience, style and performance to deliver a new passenger experience that adds value to any residential, commercial, hospitality, medical or industrial building.

THE GEN3 FAMILY OF ELEVATORS

-  Gen3 Prime
 -  Gen3 Core
 -  Gen3 Nova
 -  Gen3 Life
 -  Gen3 Stream
-

Gen3™ elevator (available in MRL and MR)

The Gen3 elevator combines elegant design and advanced engineering. Its style, comfort and speed ensure your tenants and visitors experience your building at its best.

Travel height maximum	96m			
Maximum stops	32			
Speed (mps)	0.7	1	1.5	1.75
Capacity	340kg - 1768kg			

Compact Gearless Machine: Combined with ReGen drive, reduces energy consumption up to 75%.**

Otis ONE™ IoT Digital Platform: Provides Gen3™ elevator's connected intelligence with emergency audio to OTISLINE®

Smooth Coated Steel Belts: Reduce noise from metal-to-metal contact of steel ropes to deliver a smooth, quiet ride.

Otis Cab Air Purifier: Significantly reduces airborne bacteria and viruses.

Otis eCall™ app: Summon your elevator remotely for a touchless experience.

Compass® 360 destination management: Cuts travel time up to half compared to traditional systems.

Wide Range of Aesthetics like Ambiance: Available in Natural and Modern editions

**Compared to conventional systems without regenerative technology.

Reliable, as expected

Some of the world's most distinguished buildings trust in Otis technology. Manufactured exclusively at our ISO-certified factories, it is the result of our most advanced thinking, global experience and deep engineering expertise. All so you can be sure of getting exceptional Otis performance day after day.

PULSE™

The Pulse System continuously monitors the elevator's coated steel belts to safeguard their integrity, ensuring safe, efficient operation and reduced inspection downtime.

AUTOMATIC RESCUE OPERATION

Battery-powered systems deliver passengers safely to the nearest floor during a power failure.

'MADE IN OTIS'

At Otis, quality, safety and reliability are the hallmarks of exceptional design. Manufactured exclusively at our ISO-certified Bengaluru factory to Otis' exacting standards, the Gen3 Stream takes safety and reliability to new heights. It also underscores our commitment to the 'Make in India' initiative.

One platform. So many possibilities.

With the Otis ONE IoT digital platform fully integrated, the Gen3 elevator is more than a way to move people – it's a platform for possibility. It's about having an intuitive solution that adapts to the current world of technology and is ready for the world to come.

The core of the Gen3 elevator, the Otis ONE IoT digital platform solution is designed to evolve. Powered by the Internet of Things (IoT), machine learning and cloud connectivity, with a subscription, future updates are only a download away.

The Otis ecosystem

The Otis ONE IoT digital platform is part of a powerful, expanding ecosystem of technologies and capabilities that integrate APIs for service, operation, elevator calling and more. These integrations enable features like robot, voice and gesture interaction with expansion potential.

SERVICE DATA APPLICATION PROGRAMMING INTERFACE (APIs)

Integrate data into a building management system (BMS) to stay up-to-date with your elevator's availability, maintenance, repair and call back data.

REAL-TIME OPERATIONS DATA APIs

Building owners and facility managers can access real-time data to receive elevator status updates, performance insights and alarm information.

ELEVATOR CALLING APIs

Easily call and place elevator destination requests. And, as many businesses turn to service robots to improve the customer experience and productivity for their employees, APIs can connect service robots without hard-wired connections.

Otis ONE™

SERVICE THAT'S A STEP AHEAD

With Otis ONE IoT digital platform software-enabled service, you'll experience greater system transparency and predictability, enabling you to harness the power of advanced monitoring, big-data analytics and predictive maintenance to identify and address potential issues before they happen.

PROACTIVE COMMUNICATION

Real-time notifications

Ongoing status updates and 24/7 proactive monitoring ensures your equipment stays up and running - or we'll notify you as soon as an issue is detected.

Informed repairs

Service requests are closed sooner with automatic alerts that provide mechanics accurate fault information and the parts needed before they arrive at your building.

REASSURED PASSENGERS

Voice call for emergencies

Connects passengers with OTISLINE via voice call to provide greater peace of mind during an entrapment.

PREDICTIVE INSIGHTS

To ensure your business continuity, mechanic visits are planned based on predictive maintenance algorithms so that problems can be fixed before they cause a shutdown.

AN ELEVATOR WITH A HEARTBEAT

The Gen3 elevator monitors equipment health and performance in real time, 24/7. The information is collected and analyzed against more than 30 years of Otis foundational data to uncover new insights that help better predict and solve issues, and avoid unexpected downtime. That way, you don't have to worry about an unexpected shutdown.

REMOTE INTERVENTION

Where allowed

Remote reset

In case of minor issues, where codes allow, we can reset your equipment remotely within minutes.

Remote assistance

In case of passengers trapped in the car, we can release them promptly after safety conditions are checked.

Customized lift operations

Our remote experts can customize to match your needs: modify door opening speed, manage floor access and personalize voice announcements.

Faster, more informed repairs

We're empowering mechanics with automatic alerts, more data and new digital capabilities.

Transparent information

OTIS CUSTOMER PORTAL

- Manage in real time every unit within your portfolio in a single view
- Visualize the benefits of predictive insights
- Leverage elevator health reports to prepare for your future investments
- Place online service requests

OTIS DEVELOPER PORTAL

- Leverage the Otis open API to integrate the data you need into your own system
- Easy set up with clear software documentation and sample code

Experiences. Advanced.

When we set out to create a new experience for our elevator, we designed it with people at the center of everything. The result? A smart, connected, sophisticated system that advances the passenger experience in as many ways as possible – and raises expectations for what an elevator can be.

Compass® 360 elevator dispatch management with SmartGrouping™ technology organizes travel between floors to maximize efficiency, grouping passengers into elevators to quickly reach floors in similar zones.

STYLISH

Sophisticated design is at the heart of Compass 360. With user interface screens in a range of sizes, shapes and styles, the look and feel can reflect your building aesthetics or brand ID.

SMART

You can dedicate access to particular elevators and floors, as well as deploying a VIP coded entry mode. Compass 360 also connects with your security and access systems.

SIMPLE

Compass 360 acts as a virtual concierge, smoothing people's journeys. Passengers are directed to the most appropriate elevator by the easy-to-use, intuitive wall-mounted screens.

Design. Advanced.

OTIS in collaboration with design curators introduces a new aesthetic for elevators – Ambiance.

A unique play of materials, form, textures and patterns allows the Ambiance aesthetics to breathe life to your elevator space. The distinctive lighting element illuminates the accented materials in a contemporary dance of shadows and light, classic fixtures embody design for longevity and hard edges relent to fluid curves around the cornices.

We call it- Art in Motion

Ambiance cab design. **Art in motion.**

Otis has a globally integrated design team, which has been screened by experts to provide users carefully selected Ambiance cab designs. You can choose your own style to create a space for your lifestyle.

+ Natural

Natural Ambiance designs and materials are warm and bright using printed designer steel. A sublime choice of materials blended to evoke serenity.

+ Modern

Modern Ambiance designs and materials are contemporary and vibrant using a combination of printed designer steel and shades of Stainless Steel Hairline
